## RISE IN INDIA - THE REVIVAL OF EXPORTS

K V Priya

India's merchandise exports surpassed \$400 billion in financial year (FY) 2022. This is an all-time high for the country, comfortably above the five-year average of \$300 billion before the Coronavirus pandemic struck.

It is also far higher than the previous record of \$330 billion achieved in 2018-19 and a quantitative leap from \$292 billion in 2021.

What's even more important, pointers suggest that this season of cheers will continue to aid Indian exports in their upward spiral in the coming months.

India's merchandise export in May 2022 stood at \$37.29 billion, a 15.46 per cent year-on-year (Y-o-Y) increase compared to \$32.30 billion in May 2021, according to official data released by the Ministry of Commerce.

India's merchandise export in the first two months of current fiscal year (April-May 2022-23) was \$77.08 billion with an increase of 22.26 per cent over \$63.05 billion in the same period of 2021-22. "India had set an ambitious target of \$400 billion of goods exports and achieved this target for the first time ever. I congratulate our farmers, weavers, MSMEs, manufacturers, exporters for this success. This

is a key milestone in our Atmanirbhar Bharat (self-reliant India) journey. #LocalGoesGlobal," the Prime Minister tweeted joyously.

### Driving Force

The drivers of India's export sector growth, despite the odds forced by the COVID-induced lockdown, include

engineering, petroleum, gems and jewellery, agriculture, organic and inorganic goods.

Exports of major commodities that recorded growth during April 2021-March 2022 over the same period in 2020-21, include petroleum products (152.1%), cotton yarn, handloom products. (55.1%),

cereals (52.2%), gems and jewellery (49.6%), man-made yarn (46.9%), engineering goods (45.5%), coffee (49%), electronic goods (40.5%), jute (36.2%), leather and leather products (32.2%), chemical (32.0%), plastic and linoleum (31.1%), marine products (30.0%), textiles (29.9%), handicrafts, hand-made carpets (22.0%), cereal preparations and miscellaneous processed items (21.9%).

Here is a snapshot of how the different sectors bucked the trend, jumping on to a higher growth trajectory:

- India's merchandise exports were propelled by growth in outward shipments of petroleum products riding on rising global demand, hike in crude oil prices due to the pandemic made worse by geopolitical tensions due to the Ukraine war.
- India's gems and jewellery exports witnessed a 56 percent jump in 2021-22 to touch \$39 billion, as compared to the previous financial year's, \$25 billion. With the reduction of import duty on cut and polished diamonds in Union Budget 2022, this is only going to rise. The Emergency Credit Line Guarantee Scheme (ECLGS) launched by the government as a

## ANIMATION, VISUAL EFFECTS, GAMING & COMICS THE FUTURE OF JOBS IN INDIA

Dr. Rajesh Kumar

The AVGC (Animation, Visual Effects, Gaming and Comic) sector has witnessed phenomenal growth in recent years. The Government of India has prioritized this sector, identifying it as one bearing the potential to become the torch bearer of 'Create in India' and 'Brand India'. Recently, the Ministry of Information and Broadcasting (MIB) constituted an AVGC Promotion Task Force in consonance with the announcement made by Finance Minister Nirmala Sitharaman while presenting the Union Budget 2022. The task force has been mandated with the responsibility to recommend various measures to build capacity of the AVGC sector in the Indian market and to serve the needs of the global market.

It is amply visible that the digital revolution has contributed immensely in the development of animation, visual effects, gaming and comic sectors. The FICCI-EY 2022 Report compiled by the Federation of Indian Chambers

of Commerce and Industry (FICCI) and its consulting firm Ernst & Young (EY) points out that the animation and visual effects sector is expected to grow more than double in three years reaching approximately Rs. 180 billion. Whereas, in the online gaming segment, the industry is expected to grow from Rs. 65 billion (2019) to Rs. 187 billion by 2022 end with a CAGR of 43 percent. Statista foresees similar

trend in the animation and visual effects sector, indicating an expected growth rate of 29 percent from Rs. 83 billion in 2021 to Rs. 180 billion in 2024. FICCI-EY 2022 report mentions

that the demand has expanded with the unprecedented growth in kids broadcasting viewership, availability of low-cost internet access and growing popularity of Over the Top (OTT) platforms.

### Animation and Visual Effects: Scope and Career Prospects

Animation and Visual Effects (VFX) sectors have become an integral part of the media and entertainment industry as they are widely used in unique and innovative ways for storytelling. Each is an art which incorporates creativity, imagination, sketching, drawing and technical skills for creation or recreation of a story.

In a simple way, animation may be defined as a kind of visual effect that creates movements for objects and characters in either 'Two-Dimensional' or 'Three

# PATH-BREAKING INITIATIVES UNDERTAKEN BY THE GOVERNMENT OVER THE LAST 8 YEARS

## Part VII- Ujjwala Yojana

The daily act of cooking has been a major health hazard for millions of women in India, especially in rural areas, due to the use of traditional fuels. Till 2014, about 100 million households in India were deprived of clean LPG fuel and used traditional biomass fuels such as firewood, dried cow dung, agricultural waste, charcoal etc. as cooking fuel. Use of such toxic fuels posed major health hazards for millions of women in India, especially in rural areas. The toxic smoke emitted by these fuels contains particulate matter and harmful chemicals that are harmful to eyes and lungs, causing acute and chronic respiratory illness. The smoke also contains carcinogenic elements causing lung cancer. Apart from women,

India and aimed to benefit families especially the women living Below Poverty Line (BPL) by providing concessional LPG

submitting the same to the nearest distributor. The

Most backward classes, tea garden, forest dwellers, islands). Also, the scheme target was revised to 8 crore LPG connections, with an additional budgetary provision of Rs. 4,800 Crore.

To cover remaining households under PMUY, Ujjwala 2.0 was started on August 10, 2021 on pan-India basis to provide additional one crore LPG connections. As on January 31, 2022, the government has achieved the target of providing one crore LPG connections under Ujjwala 2.0. Based on a large number of applications, the Government has further extended the scheme with 60 lakh more connections under Ujjwala 2.0.

### LPG Panchayat

Since the PMUY beneficiaries were mostly first-time users of LPG, they were apprehensive about the safe handling of LPG at their homes. LPG Panchayats were envisioned to discuss safe handling of LPG, and benefits of using LPG over traditional fuels. Designed as community meetings, the Panchayats served as platforms for LPG consumers to interact with each other, share experiences, and promote mutual learning. It brought together various stakeholders from the LPG ecosystem such as OMC officials, distributors, mechanics, deliverymen, etc. LPG Panchayats provide opportunity for consumers to interact with them and share their questions and apprehensions.

### Features

- Deposit-free LPG connection given to the eligible household with financial assistance of Rs 1,600 per connection.
- Free of cost first LPG refill and gas stove is provided for the first time by public sector Oil Marketing Companies (OMCs).
- Connections are issued on the name of women beneficiaries.
- EMI facility is also provided for stove and refill cost.
- It is complementary to Prime Minister's 'Give It Up' campaign under which 75 lakh middle class and lower middle class households have the option to voluntarily give up their cooking gas subsidy.

### Noteworthy Stats & Facts

- Over 9 crore households have been covered under Ujjwala Yojana.
- The target to provide Eight crore deposit free LPG

connections was achieved in September, 2019, seven months ahead of the scheduled date.

- LPG coverage in India has improved to 104.1% as on January 01, 2022, as compared to 62% as on May 1, 2016.
- Per capita consumption of PMUY beneficiaries has increased from 3.01 refills in 2019-20 to 3.66 refills in Financial Year 2021-22 (till Feb 2022).
- With the implementation of PMUY, approx. One lakh people have got employment through the LPG distribution system.
- As part of Pradhan Mantri Garib Kalyan Package, more than 14 crore free LPG refills were provided to the PMUY beneficiaries during COVID-19.
- Under the 'Give It Up' initiative, more than one crore people themselves gave up the subsidy on LPG, which benefited the needy people.
- 35.1 % PMUY beneficiaries are from SC/ST categories (as on December 01, 2021)
- Women in the states of Uttar Pradesh, West Bengal, Bihar, Madhya Pradesh and Rajasthan have been the biggest beneficiaries of PMUY.
- International Energy Agency said it is a "major achievement" in improving the environment and health of women.
- WHO report (2018) said that Ujjwala Yojana has provided 37 million women, living below the poverty line, with free LPG connections to support them to switch to clean household energy use.

## Part VIII- Ayushman Bharat

There is global evidence that primary health care is critical to improving health outcomes of a population. It has an important role in the primary and secondary prevention of several disease conditions, including non-communicable diseases. The provision of comprehensive primary health care reduces

identification of eligible BPL families was based on Social-Economic Caste Census (SECC) data provided by the Union Ministry of Petroleum and Natural Gas. To carry the scheme forward and implement it at the grass root level, District Nodal Officers (DNOs) of the Oil Marketing Companies are appointed in each and every corner across the country. The scheme aimed to increase the usage of LPG thereby reducing health disorders, air pollution and deforestation.

Public Sector Oil Marketing Companies were initially given a target of providing deposit-free LPG connection to adult woman members of 5 crore BPL households by March 31, 2019. Rs. 8,000 Crore was allocated for the scheme. Subsequently, the scheme was expanded in April 2018 to include women beneficiaries from seven more categories (SC/ST, PMAY, AAY,

children also suffered from this harmful kitchen smoke. Pradhan Mantri Ujjwala Yojana (PMUY) was launched to protect Indian women from this drudgery and make their lives healthier.

### What is Pradhan Mantri Ujjwala Yojana (PMUY)?

In May 2016, Ministry of Petroleum and Natural Gas (MoPNG), introduced the 'Pradhan Mantri Ujjwala Yojana' (PMUY) as a flagship scheme with an objective to make clean cooking fuel such as LPG available to the rural and deprived households which were otherwise using traditional cooking. The scheme was launched by Hon'ble Prime Minister, Shri Narendra Modi from Ballia district in Uttar Pradesh on 1 May, 2016. It envisaged a smoke-free Rural

The main mantra of this scheme is Swachh Indhan, Behtar Jeevan - Mahilaon ko mila samman. A Woman from a BPL household can apply for new connections under PMUY by filling the Know Your Customer (KYC) application and

morbidity and mortality at much lower costs and significantly reduces the need for secondary and tertiary care. For primary health care to be comprehensive, it needs to span preventive, promotive, curative, rehabilitative and palliative aspects of care. As per the Ministry of Health and Family Welfare (MoHFW), primary health care is the only affordable and effective path for India to Universal Health Coverage. It also provides valuable insights into structure and processes that are required in health systems to enable Comprehensive Primary Health Care (CPHC). Thus, in an attempt to move from a selective approach to health care to deliver a comprehensive range of services spanning preventive, promotive, curative, rehabilitative and palliative care, the Government in 2018 launched the Ayushman Bharat-Pradhan

Mantri Jan Arogya Yojana (AB-PMJAY).

#### What is Ayushman Bharat Yojana?

Ayushman Bharat has been launched as one of the most ambitious health missions ever to expand universal health coverage, especially in rural and vulnerable populations. Ayushman Bharat is a Centrally Sponsored Scheme having a central sector component under Ayushman Bharat Mission anchored in the MoHFW. It is an umbrella of two major health initiatives, namely Health and wellness Centres and National Health Protection Scheme.

This initiative has been designed to meet Sustainable Development Goals (SDGs) and its underlying commitment, which is to "leave no one behind". Ayushman Bharat is an attempt to move from a sectoral

and segmented approach of health service delivery to a comprehensive need-based health care service. The yojana aims to provide a service to create a healthy, capable and content new India. It has two components which are complementary to each other. Under its first component, 1,50,000 Health & Wellness Centres (HWCs) are to be created to deliver CPHC, that is universal and free to users, with a focus on wellness and the delivery of an expanded range of services closer to the community. The second component is the Pradhan Mantri Jan Arogya Yojana (PM-JAY) which provides health insurance cover of Rs. 5 lakhs per year to over 10 crore poor and vulnerable families for seeking secondary and tertiary care.

#### Ayushman Bharat - Health and Wellness Centres (HWCs)

The Ayushman Bharat - Health and Wellness Centres (AB-HWCs) mark an attempt to move from a selective healthcare approach to a more comprehensive range of services, comprising preventive, promotive, curative, rehabilitative and palliative care for all ages.

The National Health Policy of 2017 envisioned these centres as the foundation of India's health system. HWCs are envisaged to deliver expanded range services that go beyond maternal and child health care services to include care for non-communicable diseases, palliative and rehabilitative care, oral, eye and ENT care, mental health and first level care for emergencies and trauma, including free essential drugs and diagnostic services.

AB-HWCs provide free essential medicines and diagnostic services, tele-

consultation, and health promotion including wellness activities like yoga, meditation, zumba, etc. It is envisaged that these centres will not only be the point of delivery for healthcare services, but at the same time enable the community to take health in their own hands.

#### Features

- Ensure access to free essential medicines and diagnostic services.
- Enable delivery of high quality care that spans health risks and disease conditions through a commensurate expansion in the availability of medicines and diagnostics, use of Standard Treatment Guidelines (STGs) and referral protocols with advanced technologies including IT systems and focus on wellness.
- Instill the culture of a team-based approach to delivery of quality health care encompassing preventive, promotive, curative, rehabilitative and palliative care.
- Facilitate the use of appropriate technologies for improving access to health care advice and treatment initiation, enable reporting and recording, eventually progressing to electronic records for individuals and families linking it with NDHM.
- Develop strong measurement systems to build accountability for improved performance.

#### Pradhan Mantri Jan Arogya Yojana (PM-JAY)

Ayushman Bharat PM-JAY is the world's largest health assurance scheme in the world which aims at providing a health cover to the poor and vulnerable families per year for secondary and tertiary care that form the bottom 40% of the Indian population. The households included are based on the

deprivation and occupational criteria of Socio-Economic Caste Census 2011 (SECC 2011) for rural and urban areas respectively. PM-JAY was earlier known as the National Health Protection Scheme (NHPS) before being rechristened. It subsumed the then existing Rashtriya Swasthya Bima Yojana (RSBY) which had been launched in 2008. The coverage mentioned under PM-JAY, therefore, also includes families that were covered in RSBY but are not present in the SECC 2011 database. PM-JAY envisions to help mitigate catastrophic expenditure on medical treatment which pushes nearly 6 crore Indians into poverty each year.

It is fully funded by the Government and cost of implementation is shared between the Central and State Governments.

#### Features of PM-JAY

- PM-JAY provides cashless access to health care services for the beneficiary at the point of service, that is, the hospital.
- It covers up to 3 days of pre-hospitalization and 15 days post-hospitalization expenses such as diagnostics and medicines.
- There is no restriction on the family size, age or gender.
- All pre-existing conditions are covered from day one.
- Benefits of the scheme are portable across the country i.e. a beneficiary can visit any empanelled public or private hospital in India to avail cashless treatment.
- Services include approximately 1,393 procedures covering all the costs related to treatment, including but not limited to drugs, supplies, diagnostic services, physician's fees, room charges, surgeon charges, OT and ICU charges etc.

#### Noteworthy stats and facts:

- 1,18,150 Health & Wellness Centres have been operationalized till 28 April, 2022 which includes 90,509 SHC level AB-HWCs, 22,922 PHC level AB-HWCs and 4,719 UPHC level AB-HWCs.
- More than 3.28 crore persons have been treated free of cost and over 18 crore Ayushman cards have been issued (as on 7 April 2022).
- As of December 2021, 33 States/Union Territories are implementing the scheme. As on 14.11.2021, a total of 2.92 lakh hospital admissions worth over Rs. 644.5 crore have been authorized under the inter State portability feature.
- More than 1.17 lakh PMJAY golden cards have been created across India

## RISING INDIA - THE REVIVAL OF EXPORTS

response to COVID-19 for MSMEs will also help business in this sector. MSMEs comprises ninety per cent of the gems and jewellery sector.

- India's agricultural exports crossed \$50 billion during the fiscal year ending March 31, 2022. Leading this list are marine products, whose value has steadily gone up in the last few years. It stood at \$7.8 billion in 2021-22 compared to \$6.7 billion in 2019-20. The country also shipped out some 21 million tonnes (MT) of rice (17 MT non-basmati and 4 MT basmati) and 7.8 MT of wheat; the offtake of the two cereals through the Public Distribution System (PDS), too, hit unprecedented levels of 55.1 MT and 50.6 MT, respectively. Driven by robust demand for both commodity and value-added dairy products, coupled with a rise in global prices, Indian dairy exports clocked 1.70 lakh tonnes valued at over \$552 million, a 93 per cent growth in value and 63 per cent volume growth over the same period a year ago. What further aided Indian dairy export were unfavourable weather conditions in New Zealand and Australia that affected milk production in these milk surplus countries, resulting in historic high international commodity prices. This has helped Indian entities export products such as Skimmed Milk Powder (SMP), butter and whole milk powder, among others, to dairy deficit countries. The US, Bangladesh, UAE, Saudi Arabia, and Malaysia are among the bigger buyers of Indian dairy products.

- Engineering exports that include metal products, industrial machinery and equipment, automobiles and its components, transport equipment, bicycles, medical devices, and renewable equipment accelerated on two counts. One, the revival of higher demand in India's top five export destinations for engineering goods, which include the US, China, the UAE, Italy, and Germany. Two, the Union Commerce Ministry claims that the zero duty Export Promotion Capital Goods (EPCG) scheme helped in pushing up exports. The scheme allows import of capital goods for pre-production, production, and post-production (including completely knocked down/ semi knocked down thereof as well as computer software systems) at zero customs duty, subject to an export obligation equivalent to six times of duty saved on capital goods imported under the scheme, to be fulfilled in six years reckoned from authorization issue-date.

- India's electronic goods exports registered a growth of 49 per cent at \$11.0 billion in April-December 2021 compared to \$7.4 billion during the same period in 2020, the Ministry of Commerce & Industry said in a statement. The top five export destinations in April-November 2021 are - USA (18 per cent), UAE (16.6 per cent), China (7.6 per cent), Netherlands (4.5 per cent) and Germany (4.2 per cent). What helped the export of electronic goods was the number of initiatives undertaken by the Modi government to change the ecosystem to boost manufacturing, and consequently exports. These included National Policy on Electronics 2019 (NPE 2019) that aims to position India as a global hub for Electronics System Design and Manufacturing (ESDM) by encouraging and driving capabilities in the country for developing core components and creating an enabling environment for the industry to compete globally. Four schemes, namely the Production Linked Incentive Scheme (PLI) for Large Scale Electronics Manufacturing, Scheme for Promotion of Manufacturing of Electronic Components and Semiconductors (SPES), Modified Electronics Manufacturing Clusters Scheme (EMC 2.0) the Production Linked Incentive Scheme (PLI) for IT Hardware have been introduced to boost the electronics sector and put into place the necessary ecosystem.

In addition, India is also aggressively expanding its global footprints. Her exports to 19 nations in South America reached a record high of \$18.89 billion in 2021-22 (April-March), according to the Commerce Ministry. The exports have increased by an impressive 48% from \$ 12.74 billion in 2020-21.

### Reform & Transform

The Modi government has been constantly undertaking reforms to transform the Indian ecosystem. This explains the uptick in India's export performance.

Union Commerce Minister, Piyush Goyal, while addressing several sessions, including the Breakfast session Discussion on Trade 4.0 on May 24, 2022 at the World Economic Forum, Davos, Switzerland, outlined the reasons behind India's export success.

He asserted that in the last eight years, the government had focussed extensively on structural reforms, which has placed India in good stead.

Of this, exports were supported by several production-linked incentive (PLI) schemes. First introduced in March 2020 and later in Budget 2021-2022 Finance Minister Nirmala

Sitharaman announced an outlay of Rs 1.97 lakh crore for the PLI covering 13 sectors aimed at boosting domestic manufacturing under the Atmanirbhar Bharat initiative of the government.

This helped manufacturing in India to compete in the global markets.

Another initiative that has helped to boost Indian exports is the Interest Equalisation Scheme (IES). Launched on April 1, 2015, IES provides pre- and post-shipment export credit to exporters in rupees. At the time, exporters were facing increasing credit costs in their export cycles due to the stagnation of global demand and extended credit.

In April last year, the scheme was first extended till June and later till September 2021. The Reserve Bank of India in March this year again extended the interest equalisation scheme for pre- and post-shipment rupee credit for MSME exporters till March 2024 with the objective of boosting outbound shipments.

Speaking at the M V Kamath Centenary Memorial Lecture last year, Nirmala Sitharaman called PLI schemes a game-changer that is bringing investment in India, boosting manufacturing and exports. There can be no doubt that PLIs are an innovative idea that can reduce India's trade deficit, while boosting manufacturing and exports.

### Significance

The revival of India's exports is the story of Rising India. It is an object demonstration of how India pushes its economy to the global centre stage. It is a testament of global confidence in the Indian economy and its high quality of manufacturing. It is not only about Atmanirbhar, but about integrating India into the global supply chain.

Rising exports will stimulate the Indian economy, generate higher revenue, create employment opportunities, facilitate investment, enhance skill development, build world class infrastructure, and boost the Make in India programme.

### The Greater Goal

Here, it is important to recall Prime Minister Modi's emphasis on the bouquet of hope.

India is moving ahead with the mantra of 'Make in India' and 'Make for the World'. PM Modi said while addressing the World Economic Forum's (WEF) Davos Agenda summit on January 22 this year.

There is little doubt that dividends are high for a country that pursues and expands its engagement in international trade.

The transformation of many Asian economies - Japan, South Korea, Taiwan, China, Malaysia, and Thailand - can be traced to their robust exports. India has just embarked on this successful journey.

With such a vision to transform and reform the country and riding on a historic milestone, an ambitious target of \$1 trillion merchandise exports by 2030

has been set. Now, India must be proactive in achieving its target.

### Way Forward

A significant way to push Indian exports faster is through Free Trade Agreements (FTAs). In the first half century of its existence as an independent country, India barely had any multi-country trade deals. During the last two decades, India was a tough and slow negotiator. Of late, India has adopted a paradigm shift in the way it approaches the instrument of FTA. So, what has changed? In the last five years, India has signed 13 FTAs with its partners, including the three major agreements, namely the India-Mauritius Comprehensive Economic Cooperation and Partnership Agreement (CECPA), India-UAE Comprehensive Partnership Agreement (CEPA) and India-Australia Economic Cooperation and Trade Agreement (IAECTA).

Hailed as a watershed moment, IAECTA, inked on April 2 this year, is estimated to double trade between India and Australia, generating one million jobs in the next five years. Currently bilateral trade between India and Australia stands at \$27 billion.

The Comprehensive Economic Partnership Agreement (CEPA) between India and the UAE, which came into effect from May 1, is expected to increase two-way trade to over \$100 billion in five years from the existing \$60 billion. It allows duty exemption on 90 per cent of Indian exports.

In the coming months, more FTAs are on the anvil.

An agreement with Israel is almost sealed; another with the Gulf Co-operation Council (GCC), the union of the oil-rich Persian Gulf states, is next in line.

However, despite the best efforts by the Indian government, Indian industry has not been able to fully capitalise the potential offered by the FTAs.

Take for instance the FTA signed with Japan in 2011. India industries were not ready to meet the stringent quality norms set by Japan. If Indian industry had met the requirements, then every stakeholder would have stood to gain.

Nevertheless, realising the resilience of domestic service sector that would give an unparalleled edge to boost exports, India is vigorously pursuing FTAs with this in mind.

The two recently concluded landmark trade agreements, i.e., India-UAE's CEPA and the IAECTA with Australia, emphasises on the service sector. There is much collaborative potential. Australia is opening for Indian chefs, yoga teachers and construction services, while India is offering medical value services and its big tourism potential.

It is necessary to understand why India attaches additional importance to the service sector. Exports from this sector contribute to 40 per cent of total

exports. More specifically, this category has been growing at a faster rate than merchandise exports.

India's services exports touched \$254.5 billion in 2021-22, up 23.4 per cent from \$206.09 billion in 2020-21.

Services are exported under IT & IES, consultancy services, AVCG (audio visual, gaming and Comic), travel and tourism, logistics services, hospitality, educational, medical, or financial organisations opening outlets abroad, and other business and financial services led by fintech.

Riding on expected rebound post-Covid recovery and the cost advantage of cheap Indian labour, an ambitious target of \$1 trillion by 2027 has been set for the service sector.

### A Global Factory

New challenges such as high tariffs, COVID-19, and increased geopolitical tensions have resulted in a mass exodus from Chinese manufacturing. The question is who will replace China, described as the 'world's factory', till recently? Not one but many contenders from emerging export economies in Asia - India, Bangladesh, Cambodia, Indonesia, Myanmar, Pakistan, Sri Lanka, and Vietnam - are trying to fill into the rather large Chinese shoes.

Of them, only Bangladesh, Cambodia, and Vietnam have seen significant growth in their global share of labour-intensive exports in the past two decades.

Given the success of neighbouring Bangladesh, which has grown into the world's second-largest clothing exporter because of its low costs, with Vietnam which has a favourite alternative to China for producing sneakers and textiles, Indian exporters, too, are focussing on labour-intensive industries and services to pick up.

With Prime Minister Narendra Modi's mantra of 'Make in India, Make for the World', India has rolled out initiatives to realise this ambitious vision.

One such initiative - the establishment of 'District Export Hub' - was announced by the Prime Minister while delivering the Independence Day Speech in 2019.

"Each district of our country has a potential equal to that of one country; each of our districts has the capacity equal to a small country in the world. Why should each district not think of becoming an export hub...Each of our districts has a diverse identity and potential for global market", he said.

With this direction, the Directorate General of Foreign Trade (DGFT), under the Commerce Ministry, is currently in the process of implementing a centrally sponsored scheme to develop districts as Export Hubs that aim to help producers across 200 districts to scale up manufacturing and find foreign buyers for their goods.

Under the proposal, the DGFT has sought funding to the tune of

**ANIMATION, VISUAL EFFECTS, GAMING ...**

Dimensional mode. The professional who does this creative art is called 'Animator'. Whereas, visual effects (popularly known as VFX) is the integration of live action footage with computer generated imagery (CGI) to create realistic imagery. The professional who prepares this creative art is called 'VFX Artist'.

The use of animation and visual effects in the media and entertainment sector has grown exponentially across the globe due to fast and ever changing

new information and communication technologies that has raised the demand of skilled manpower for animation and visual effects. In the entertainment sector, movies like Hanuman, Ramayan, Bal Ganes, Delhi Safari, The Lion King, Life of Pi are some of the animated movies that have become blockbusters at the Indian box office. Whereas, animated cartoons like Tom and Jerry, Doraemon, Shinchan, Mr. Bean, Chota Bheem, Motu Patlu

and Pokemon and many more are quite popular among kids in every household across the country.

In the education sector, use of animation and graphics make the teaching and learning process more innovative and interesting, helping students understand various aspects of a lesson in an effective manner. Educational applications, language learning applications, educational Youtube channels, medical and architectural animated videos and many more are quite popular now-a-days.

This trend has generated a plethora of career opportunities in film and television, print and online news media, advertising, cartoon, gaming, comics, online learning, corporate houses and real estate etc. After completion of an academic program or training in animation and visual effects, one can pursue a career as an animator, visual effect artist, graphic designer, multimedia developer, game developer, layout artist, storyboarding, three-dimensional modeling, texturing and lighting designer and more opportunities in pre and post production.

**Gaming and Comic Sector: Scope and Career Prospects**

Gaming sector in India is also witnessing exceptional growth due to the digital revolution. According to a KPMG report, the number of online gamers increased from 250 million in 2018 to 360 million by the mid of 2020 which is expected to reach 510 million by 2022 end. According to Statista, the market value of gaming industry in India is expected to reach Rs. 143 billion by 2022 end and shall witness rapid growth at a CAGR of 21% during the next five years and will reach to Rs. 290 billion. The gaming industry is progressing fast due to emergence of new communication technologies, which is accessible to tech-savvy young generations through smartphones with better internet connectivity. Gaming sector provides various career opportunities such as game artist and designer, game developer and programmer, game play tester, game animator, visual artist, audio engineer, interpreters and translators.

The comic sector has also shown an optimistic scenario in the post pandemic era and is reviving after a decline in the market for a long period of time. The reason for comic sector regaining its popularity is due to movies and television programs based on comics, video games and multimedia platforms that have recreated awareness about the various characters of comic books. Many comic distributors and publishers plan to launch their television channels to show their popular characters through animation. Diamond comics is reviving its popular characters like Chacha Chaudhary, Billoo, Captain Vyom, Chotu Lambu, and Pinki etc. on various digital platforms, television and mobile phones.

**Academic Programmes and Training in AVGC Sector: The Current Scenario**

Academic programmes and training for animation, visual effects, gaming and comics is multidisciplinary in nature and its scope is increasing manifold

across the World. These programmes impart and develop creative as well as technical skills among the learners which is essential for the AVGC sector. There are various public as well as private universities/ institutions in India which offer such programmes:

- National Institute of Film and Fine Arts, Kolkata
- St. Xavier's College, Kolkata
- Maya Institute of Advanced Cinematic (MAAC) Centers across the country
- Arena Animation Centers across the country
- FX School, Mumbai
- Picasso Animation College, Bangalore
- Mayabious Academy-School of Animation and Visual Effects, Kolkata
- Toonz Academy, Thiruvananthapuram
- Zee Institute of Creative Art, Bangalore
- Whistling Woods International, Institute of Film, Communication & Media Arts, Mumbai
- AAF School of Animation, Noida

However, it is important to systematize academic programmes and training in the animation, visual effects, gaming and comics sectors from basic to advanced level. That has been identified by the government and preparation of a National Curriculum Framework for AVGC sector is underway.

**National Policy Framework for AVGC Sector**

The Government of India has planned to streamline this sector through a national policy framework in order to build its capacities and to enhance global positioning of the Indian AVGC industry. The AVGC Promotion Task Force is currently preparing a draft action plan in consultation with various stakeholders from industry, academia and state governments under the chairmanship of Secretary, Ministry of Information and Broadcasting.

The Task Force will primarily focus on preparing a national policy framework for AVGC sector; recommending national level curriculum framework for graduate, postgraduate and doctoral programs in AVGC associated sectors; facilitating skill oriented initiatives in collaboration with academia, industry and vocational training institutions; increasing employment opportunities; promoting market development activities to extend global reach of Indian AVGC industry and enhancing exports and recommending incentives to attract FDI (Foreign Direct Investment) in AVGC sector. The Ministry of I&B has prioritized this sector by mentioning that India has the potential to capture five percent of the global (US\$ 40 billion) market share by 2025. It shows an annual growth of around 25-30 percent which will generate 1,60,000 new job opportunities on an annual basis. The entire scenario projects phenomenal growth in terms of revenue and job opportunities.

**National Curriculum Framework for AVGC Sector**

The evolution and development of AVGC sector is in its initial stage, which has to go a long way in coming decades due to fast expansion of information

and communication technologies. The projected growth will demand a huge number of manpower with diverse backgrounds, therefore, systematic teaching, training and research is imperative for animation, visual effects, gaming and comics sectors. Therefore, preparation of a national curriculum framework in accordance with National Education Policy (NEP) 2020 for graduate, postgraduate and doctoral programs in AVGC and its related areas is a welcome step with a futuristic approach. NEP 2020 with its holistic, multi-disciplinary, experiential, learner-centric, inquiry-driven, skill-orientation and enjoyable approach will certainly guide in this regard.

**Skill Development and Employment Opportunities**

In the fast and ever changing communication & technology scenario, India is witnessing a tech boom that has raised the demand of a huge number of skilled professionals. In the AVGC sector itself, the projection of new job opportunities is around 1,60,000 on an annual basis according to the Ministry of Information & Broadcasting. Here, it is important to mention that skill development is directly associated with employment opportunities in today's scenario. And it is a must for animation, visual effects, gaming and comic sectors, which requires extensive technical and creative skills. Therefore, skill development through academic programs and training in systematic collaboration with industry and academia will play a major role in this regard. It is one of the key components in policy framing by the AVGC Promotion Task Force.

**Global Positioning of Indian AVGC Industry**

Industry Research, a leading market and business report provider has mentioned that the Global Animation, Visual Effects and Gaming market size is projected to reach from 419300 million dollar (419.3 billion dollar) in 2020 to 517040 (517.04 billion dollar) million dollar during 2021-27. According to a leading market research and advisory, Mordor Intelligence, the Global Animation and VFX market is expected to grow at a CAGR of over 11.5% during 2021 to 2026. The report mentions that the global market of animation and visual effects is highly competitive without dominant players.

It means that positioning of the Indian AVGC industry in a global scenario requires a well-planned and effectively executed strategy, if it has to capture 5% share of the global market by the year of 2025. AVGC Promotion Task Force has been assigned the task to formulate a comprehensive strategy which will not only focus on reaching in the global market, but also grab the attention of global players in the Indian market through foreign direct investment. That will pave the way for 'Create in India' and 'Build India' in true sense.

## RISING INDIA - THE REVIVAL OF EXPORTS

Rs 6,000 crore to develop 200 of the country's 773 districts into export hubs, in a phased manner. It has sought an allocation of Rs 50 crore per district.

The District Export Hub Scheme, if approved by the Finance Ministry, will be part of the new Foreign Trade Policy (FTP). The FTP was initially scheduled for April 1, 2020, but was postponed multiple times to April 2022 owing to the pandemic. In May 2022, it was further extended by another six months to September this year.

Each of these District Export Hubs will specialise in several products. With foreign trade constituting 45 per cent of India's GDP, heightened emphasis on economy-building via districts as export hubs will prove pivotal in organizing the unorganized MSME sector.

This should also help India to calibrate its trade strategy to expand its basket of products it exports and to tap into newer geographies.

The NITI Aayog, in partnership with the Institute of Competitiveness, has prepared the Export Preparedness Index (EPI) 2021 for Indian states.

It reflects the measures taken and implemented at national and sub-national levels. The index ranks all the states and Union Territories in the country to determine their export readiness. It aims to examine the export performance and the export readiness of the states and Union Territories.

### Challenges Ahead

An emerging area of concern is the widening trade deficit, which India needs to address

urgently. India's trade deficit rose 87.5 per cent to \$192.41 billion in 2021-22 as against \$ 102.63 billion in the previous year. This is on account of stupendous jump in purchase of crude oil and gold.

India imports 85 per cent of crude oil, whose prices have jumped to touch almost \$120 per barrel in the last few months due to the ongoing Russia-Ukraine conflict. It is estimated that global crude price could further escalate to \$135 this year. The Indian basket crude price averaged \$84.67/bbl. (a barrel of crude oil) during January 2022 against \$73.30/bbl. during December 2021 and \$54.79 /bbl. during January 2021.

India's gold imports rose by 33.34 per cent to \$46.14 billion during the 2021-22 compared to import of precious yellow metal worth \$34.62 billion in 2020-21.

The above two factors are likely to severely impact India's

current account deficit or CAD, when the total value of goods and services a country imports exceeds the total value of goods and services it exports.

The CAD is estimated to surge to a three-year high of 1.8 per cent or \$43.81 billion in financial year 2022, as against a surplus of 0.9 per cent or \$23.91 billion last financial year 2021.

With high stakes involved in export promotion, India needs to reap the new winds of trade in its favour. And it is clearly determined to do so.

FOR ISSUE DATED 11-17 JUNE 2022

Question: India's largest drone festival 'Bharat Drone Mahotsav' was held in May 2022 where various use cases of drones were exhibited. There has been a significant rise in drone services and drone-based industries in India. Share your opinion on what areas can make use of drone technology to better serve people (health, education, agriculture, security etc).

AYUSH KHIRWAR

NEW DELHI

Drones are Unmanned Aerial Vehicles (UAV) which is remotely controlled by human intelligence. The positives provided by drones are multiple including the enhanced level of human safety and increase in precision and efficiency. The Government of India is working hard to make India, a global hub for drones under Atmanirbhar Bharat Abhiyan and also rolled out liberalised 'Drone Rules 2021' as it is a critical and emerging technology.

There are multiple areas in which drones can serve people better:-

1. Deployment in defence- use in combat, communication, reconnaissance, situation analysis and domestic law enforcement, for example riot control.
2. Use in precision agriculture for precise application of fertilizers, seeds, pesticides through aerial route leading to higher yield for small farmers.
3. Monitoring of land parcels and creation of land banks for schemes like SVAMITVA and facilitation in land consolidation for better mechanisation of agriculture.
4. Use in healthcare - recently Government of Telangana started a project to deliver vaccines using drones in remote areas.
5. Employment- India has a huge number of technical graduates, many of which could be accommodated in drone technology.
6. Surveillance of difficult terrain like glacial lakes, volcanic structures, dense forest, etc for their scientific study. eg. Drones used by Kaziranga National Park to check one-horned Rhino poaching.
7. Delivery of grocery and food products by e-Commerce websites.

Hence, it is evident that the Drone technology is the need of the hour and needs funding and policy handholding for the initial time period.

### Ministry of Housing & Urban Affairs Launches Skill Development Initiative NIPUN

The Ministry of Housing & Urban Affairs has launched an innovative project for skill training of construction workers called NIPUN (National Initiative for Promoting Upskilling of Nirman workers). The project is being implemented as

part of the Deendayal Antyodaya Yojana-National Urban Livelihoods Mission (DAY-NULM) to train over 1 lakh construction workers, through fresh skilling and upskilling programmes. This initiative will enable Nirman workers to be more proficient and skilled while making them adopt future trends in the construction industry by increasing their capabilities and diversifying their skill sets. This would provide construction workers with work opportunities in foreign countries also, according to Shri Hardeep Singh Puri, Minister for Housing & Urban Affairs. The construction industry is poised to become the largest employer by 2022 and needs 45 million additional skilled workers over the next 10 years.

### Employees State Insurance (ESI) Scheme to Cover Entire Country by 2022 End

The government has decided that the Employees' State Insurance, ESI, will be implemented in the entire country by the end of this year. Presently, ESI Scheme is fully implemented in 443 districts and partially implemented in 153 districts, whereas 148 districts are not covered under ESI Scheme. The medical care services will be provided through establishing new Dispensary cum Branch Office in collaboration with Hospitals of Ayushman Bharat - Pradhan Mantri Jan Arogya Yojana. The decision was taken during the 188th meeting of ESI Corporation under the Chairmanship of Labour and Employment Minister Bhupender Yadav on 19th June. ESI Corporation has decided to set up 23 new 100 bedded hospitals across the country. Besides these hospitals, five doctors' dispensaries at 62 places will also be opened.

### Pradhan Mantri National Apprenticeship Mela Held in 10 Districts of Odisha

The Ministry of Skill Development and Entrepreneurship (MSDE) organized the Pradhan Mantri National Apprenticeship Mela across 10 districts in Odisha on 21st June. Over 100 companies participated in the fair to provide employment opportunities to individuals who had 5th-12th-grade pass certificate, skill training certificate, ITI Diploma, or a graduate degree. The aspiring apprentices were given several choices of trades, including locally relevant job roles such as welder, electrician, beautician, mechanic and more. This program aims to encourage employers to hire apprentices from these targeted districts and assist them in identifying the right job roles while building their potential through robust skill training. In addition, candidates will receive certificates recognized by the National Council for Vocational Education and Training (NCVT), ensuring increased employability, giving them an opportunity to become entrepreneurs in their respective domains.
